Allowable Subject Matter

1. Claims 1-20 are allowable.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for allowance:

The closest prior art is to Nummelin (U.S. Patent No. 6,308,164), and Gill et al (Wo9904370). Nummelin teaches a project management system for creating and assigning tasks, project scheduling, predicting project completion dates, and reporting resource allocation. Gill et al teaches a project management system for controlling task assignments. However, neither Nummelin et al nor Gill teaches determining in a computer whether said second flow time is greater than the product of said first flow time and said coefficient value, and determining a new proposed start time if said second flow time is greater than said product as recited in independent claim 1.

The closest prior art is to Nummelin (U.S. Patent No. 6,308,164), and Gill et al (WO 9904370 A1). Nummelin teaches a project management system for creating and assigning tasks, project scheduling, predicting project completion dates, and reporting resource allocation. Gill et al teaches a project management system for controlling task assignments. However, neither Nummelin et al nor Gill teaches calculating whether the product of said flow expansion coefficient value and a first flow time for completing the project is greater than a second time flow time, and designating a different start time if said product is not greater than or equal to said second flow time as recited in independent claims 9 and 15.
